APPEAL FOR BETTER MAIL SERVICE FOR PASS TOWNS

—

Coleman Board of Trade has petitioned the Postmaster General, Ottawa, in regard to the unsatisfactory mail service as it exists at the present time due to train schedules through the Crows Nest Pass.

The mining companies and local business establishments have been dissatisfied for some considerable time due to the fact that mail posted today lays in the post office until 5:11 o'clock the following morning and since severe winter weather has caused the trains often to miss their time schedules mail has frequently been delayed in reaching its destination. This is particularly true of mail service when delayed mail has missed the morning flight schedules out of Lethbridge.

A petition has been drafted by Board Secretary Nick Nicholas and forwarded to the Postmaster General for his study and action. It reads:

I beg to advise that representations have been made to the Coleman Board of Trade by the local mine companies, the local bank and several of the business houses in town regarding the mail service in Coleman. In this connection I have been instructed to bring the following situation regarding outgoing mail to your attention.

Prior to the change in train schedule in June 1946, of Train No. 12, out-going Eastbound mail was despatched on No. 12 Train which left Coleman at 2:06 p.m. This mail was delivered in Calgary, Edmonton and Lethbridge the following morning. Air Mail to distant points was also delivered the next morning, that is at Vancouver, Coquitlam, Regina, etc. On this schedule local businesses will be enabled, after receiving the morning mail; to prepare their outgoing mail; to "sell" itself to them as the years go by.

Burnis, like Coleman, recorded its disdain for progress in hospitalization in this area.

The rest of the District voted overwhelmingly in favor of the additional expenditure. The ratepayers in those areas desire better hospitalization for the same amount of money as they pay to-day for little or no hospitalization.

Permission is now sought from the Board of Public Utility Commissioners for the increased expenditures whose decision will be governed by the recent vote. It is understood that the contractors Shougu Construction Western Ltd. of Calgary have been gathering material for the building and only awaited the result of the vote before finalizing their plans. Once winter relaxes its grip on the site work is expected to begin—Coleman Journal.

TRIO FACES ARMED ROBBERY CHARGES

—

Constable W. F. G. Perry, of the Calgary RCMP detachment, was in the Pass this week in charge of the three men, Billingsley, Graham and Madison, arrested in Calgary last week on charges of armed robbery at Blairmore and Lethbridge.

The trio appeared before Magistrate Antrobus on Wednesday and were remanded for one week.

Under the new train schedule the all night delay in the local post office does not encourage the use of Air mail, since, should No. 12 Train be a few hours late, Air Mail connections with Lethbridge miss the early planes East and West bound, causing serious delay to important mail, as delivery is a day late.

If your department authorizes the use, on Train No. 682 which arrives in Coleman at 2:35 p.m. of a three letter-bag mail, as was used during the period from 17th to 24th December, 1946, the present unsatisfactory service would be rectified.

We strongly urge that this matter receive your prompt attention and that steps be taken to furnish a better mail service for Coleman and the other towns throughout the Crows Nest Pass.

Thanking you, Sir, in anticipation of your early attention to this matter,

Coleman Board of Trade.
Support has been sought from

CNP MUNICIPAL HOSPITAL GETS GO-AHEAD SIGNAL

—

The Crows Nest Pass is to have a fully modern 60-bed hospital. This statement was made official last Saturday as 1204 ratepayers of the Crows Nest Pass Municipal Hospital District No. 40 staked to the polls to cast ballots on the money by-law to either refuse or grant authorization for hospital board to issue an additional \$90,-

to the \$185,000 sanctioned Dec. 16, 1944, thus making a total of \$275,000 with which to construct and equip a modern 60-bed hospital.

888 yes votes were recorded against 274 no votes with 42 spoiled. This gave the district a 76.4 per cent yes vote which was more than sufficient as officially only 66 per cent was required by law to carry the vote.

Following are the results by depots:

Town	"Yes"	"No"	Spoiled	%
Bellevue	122	30	6	85
Maple Leaf	15	0	0	100
Blairmore	381	42	11	90
Burnis	1	4	0	20
Coleman	140	185	8	44
Frank	60	4	0	90
Hillcrest	203	11	16	90
Tod Creek	15	0	1	100
Totals	888	274	42	76

Coleman's vote was quite disappointing there being 43 more "no" votes than "yes." Why this should be is a mystery as workers pay \$10.80 per year for hospitalization today, such as it is, while they would be called upon to pay only \$10 on a \$2000 property assessment for the fully modern hospital. The public meeting held here last Wednesday was poorly attended and apparently those who voted "no" were determined to do so regardless of the advantages gained through modern hospitalization. In their case the municipal hospital will have "sell" itself to them as the years go by.

Burnis, like Coleman, recorded its disdain for progress in hospitalization in this area.

The rest of the District voted overwhelmingly in favor of the additional expenditure. The ratepayers in those areas desire better hospitalization for the same amount of money as they pay to-day for little or no hospitalization.

This section of the highway has been re-surfaced and will be re-routed in places. It is part of the Southern Trans-Canada Highway which is the only highway in Alberta open twelve months of the year to British Columbia and the Western United States and is travelled by thousands of motorists yearly.

This link connects the Crows Nest Pass which has a population of approximately 10,000 people and is possibly one of the most highly industrialized areas in the province to the prairie towns and cities to the east. The rough, dusty nature of the road prohibits its wide use by tourist travel and more important its dual is a constant menace to safety to all those who must travel over it.

Local observers are at a loss to determine Mr. Fallow's reasons for continually branching improvements to the Pincher-Crows Nest link when he must surely be aware of its importance as the only highway outlet the province has open twelve months of the year and hence be aware of the traffic that must traverse this highway as it passes into British Columbia and the western States—Coleman Journal.

Word is received of the birth of a son to Mr. and Mrs. Gordon Swart at Macleod.

Mrs. Griffith Parry left on Monday night's train for Tacoma, Washington where she intends spending a month or so.

W. E. Bent and Lawrence Bent were business visitors to Lethbridge the early part of this week.

Mrs. Peter Iwasuik is filling the vacany left by Mrs. Griffith Parry, who, owing to her bad health has resigned the position as teacher of the junior room of the village school.

One of the best ways to make enemies is to insist on singing for your friends.

A PARADOX
My Baby sister is a teaz,

Though she has special charms;

The only time the house has peace is when she's up in arms.

—Dora Lee Yoder, in Grit.

to the \$185,000 sanctioned Dec. 16, 1944, thus making a total of \$275,000 with which to construct and equip a modern 60-bed hospital.

Coleman's Board of Trade is greatly perturbed over the apparent lack of funds in the 1947 provincial highways appropriation for the important link of highway stretching from Pincher Creek to the Alberta-BC boundary at Crows Nest.

The Board's highway committee has written and wired Mr. Fallow; the president of the Southern Trans-Canada Highway, L. L. Morgan, has wired the Minister and Blairmore's Board of Trade, which has been dormant for a number of years, has come suddenly to life in this most important point and in placing its weight behind the Coleman effort by calling upon Mr. Fallow to grant sufficient money to complete the hard-surfacing of the No. 3 southern Trans-Canada highway link from Pincher to Crows Nest, surrounding telegrams have been sent Mr. Fallow to Wm. W. Canadian Collier, and Hillcrest McPhaw Collier, as well as by Pass locals of the UMWA.

This section of the highway has been re-surfaced and will be re-routed in places. It is part of the Southern Trans-Canada Highway which is the only highway in Alberta open twelve months of the year to British Columbia and the Western United States and is travelled by thousands of motorists yearly.

This link connects the Crows Nest Pass which has a population of approximately 10,000 people and is possibly one of the most highly industrialized areas in the province to the prairie towns and cities to the east. The rough, dusty nature of the road prohibits its wide use by tourist travel and more important its dual is a constant menace to safety to all those who must travel over it.

Local observers are at a loss to determine Mr. Fallow's reasons for continually branching improvements to the Pincher-Crows Nest link when he must surely be aware of its importance as the only highway outlet the province has open twelve months of the year and hence be aware of the traffic that must traverse this highway as it passes into British Columbia and the western States—Coleman Journal.

Following is the text of telegram sent by West Canadian Colliers:

Press Releases make no mention in respect to hard surfacing THAT NECESSARY road from Pincher to British Columbia Boundary. Citizens of this district would welcome a public pronouncement by you in respect to this very necessary undertaking in this the interests of the Crows Nest Pass and the province of Alberta generally whose loss may be great as a result of decreased tourist travel.

South Alberta boards of trade and tourist bodies have always felt that Alberta was overlooking a bit in not concentrating more on construction of No. 3 highway from Irvin to Crows Nest. This highway, paralleling the U.S. boundary, is the first road reached by most American tourists coming into Alberta, and it will affect highway construction. And once

the highway connects with the BC highway leading from Kingsgate to Cranbrook, to Fernie, to the Crows Nest crossing in Alberta; it accommodates all tourists who visits us from Victoria, Vancouver, California, Oregon and Idaho. It is the only highway connecting the mining towns in the Pass with Lethbridge, Calgary and Edmonton.

For years I have carried petitions from every organization in my constituency to the Hon. Minister beginning and imploring that this road be rebuilt, regravelled and hard-surfaced. The appropriation was to have been granted in 1940, but alas, the war was on, and today this great highway is still uncomplicated still rough; still dusty; still bumpy.

The other highway, also important as a tourist highway, leads from Waterton Lakes to Pincher Creek. It was once hard-surfaced with a blower east, but it is now gone now. It needs to be regravelled, re-routed in places, regravelled and hard-surfaced.

Both these roads connect with the U. S. border and should be rebuilt without delay. If we want tourists, we have to make roads, and good roads, for them to travel on. And I would venture to say, if these roads were built, they would pay for themselves within five years. The U. S. tourists will want to see the Alaska highway. They cannot come unless these roads are built. Let us build them.

RENEW EFFORT FOR PASS HARDSURFACED HIGHWAY

—

On Monday and Tuesday, March 17 and 18, members of St. Anne's Catholic church will present their 20th annual St. Patrick's entertainment at Columbus hall in Blairmore, with curtain at 8 p.m. sharp both evenings.

Featured will be a 3-act farce entitled "The Gang's All Here," with an all local cast. Between the first and second acts there will be a drill, "Just Like A Rainbow," by 12 of the smaller girls, and between the second and third an acrobatic dance.

—

It's an ill wind that blows a person's own horn.

ways be a distributing highway for tourists coming from east west or south. Before American tourists can get where they want to go in Alberta they must use No. 3 highway for some part of its length. And on its western end it has a special need for in the Alberta part of the Crows Nest there is between Burnis and Crows Nest a community of more than 10,000 people a fair-sized little city. We hope the program for No. 3 is a progressive one so that year by year the work planned for this year can be extended east and west until the whole of the road within Alberta will be brought up to the highest standard—Lethbridge Herald.

In connection with effort to have the Pass highway hard-surfaced, E. O. Duke, MLA, had the following to say in the house at Edmonton on March 11th:

I note with a great deal of pleasure the large appropriation for main again, Mr. Speaker, I wish to bring to the attention of the Minister two very important tourist highways in my constituency, each leading from the U. S. border.

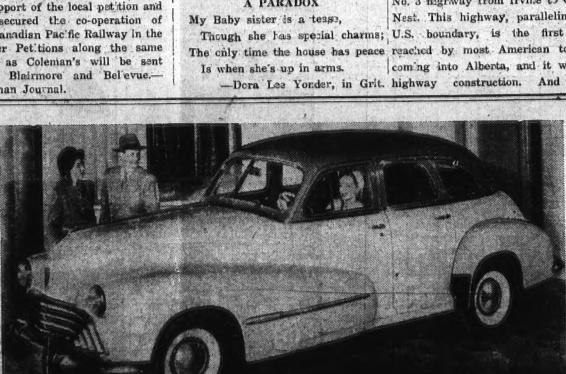

(1) The inter-provincial highway from Macleod to the Crows Nest crossing. This is the only trans-Canada highway open all the year around. Two gaps still remain ungraded, ungravelled, un-surfaced—a disgrace to Alberta; a disgrace to Canada. (1) The gap from Crows Nest to Coleman, nine miles, and (ii) the gap from Bellevue to Pincher Station, 28 miles.

The highway connects with the BC highway leading from Kingsgate to Cranbrook, to Fernie, to the Crows Nest crossing in Alberta; it accommodates all tourists who visits us from Victoria, Vancouver, California, Oregon and Idaho. It is the only highway connecting the mining towns in the Pass with Lethbridge, Calgary and Edmonton.

For years I have carried petitions from every organization in my constituency to the Hon. Minister beginning and imploring that this road be rebuilt, regravelled and hard-surfaced. The appropriation was to have been granted in 1940, but alas, the war was on, and today this great highway is still uncomplicated still rough; still dusty; still bumpy.

The other highway, also important as a tourist highway, leads from Waterton Lakes to Pincher Creek. It was once hard-surfaced with a blower east, but it is now gone now. It needs to be regravelled, re-routed in places, regravelled and hard-surfaced.

Both these roads connect with the U. S. border and should be rebuilt without delay. If we want tourists, we have to make roads, and good roads, for them to travel on. And I would venture to say, if these roads were built, they would pay for themselves within five years. The U. S. tourists will want to see the Alaska highway. They cannot come unless these roads are built. Let us build them.

WORLD HAPPENINGS BRIEFLY TOLD

At East London, South Africa, Princess Elizabeth opened a new \$16,000,000 drydock bearing her name.

The baby show, a big attraction at the Canadian National Exhibition in pre-war years, is to be revived for this year's fair.

A self-portrait by Rembrandt, depicting the painter in a dark cloak crossed by a gold chain, realized 750 guineas (\$3,150) at an auction.

In Detroit, Mrs. Franklin D. Roosevelt made an appeal for modification of immigration laws to permit displaced persons to enter the United States.

The United States sent 94,833 metric tons of food to Japan during February, largest amount since August, when 212,651 metric tons were shipped.

The 11-year-old Duke of Kent was among schoolboy volunteers who mounted a theatre stage in London to "help" illusionist Jasper Maskelyne at his tricks.

With a budget for London's Metropolitan Police now averaging \$8 a week, 1,467 men have joined the force since the beginning of the year. Two are Canadians.

With a bumper Annapolis valley fruit crop counting for most of the gain, Nova Scotia farmers earned \$5,500,000 more from the sale of their products last year than they did in 1945.

Man Who Invented Toast Not Known

The origins of toast are lost in the mists of antiquity. Some claimed that Prometheus taught us to toast when Charles Lamb did for roast pig; give us that, it is at least a plausible theory of how it came to be. Most probably the actual inventor will never be known, but it is believed so many people have contributed to him at every crossroads, adding immeasurably to our traffic problems. Toast is the sine qua non of every American breakfast—not even coffee would be less readily dispensed with. Every matronial knows that the quick-easy meal of toast and bacon, bed in the morning is not to tangle a bell but to open the kitchen door a chink and let the fumes of toast like incense pervade the house—New York Sun.

The secret of happiness is not in doing what one likes, but in liking what one has to do.

BARS ARE DOWN—The love that laughs at locksmiths made possible the reunion in New York, pictured above, held on an assault charge in Missouri. ex-G.I. Drexel Clift, Maryville, Mo., had to raise bail for his release, and Marguerite Motte, 20, of St. Louis, from France, had to be released from the Island, where she had been held for immigration paper "irregularities". With all bars temporarily down, they were set to wed when photo was made.

Health LEAGUE presents TOPICS of VITAL INTEREST

PERNICIOUS ANAEMIA

This disease is symptom of all anaemias, a shortness of breath, and as a characteristic pallor, the reason being that anaemic blood carries less oxygen than normal blood, so that the sufferer has to breathe more quickly in order to obtain a normal amount of oxygen.

Anaemia is of two types, primary and secondary, and the most important of the primary class is pernicious anaemia.

This is a grave, progressive disease interrupted by remissions, occurring without any discernible cause, developing slowly, showing certain changes in the blood and the blood-forming organs, in the central nervous system, and in the digestive tract. The cause of the disorder is unknown, but it is generally confined to middle life. It does not occur in children and cases among persons more than 60 years of age are rare.

Usually the first noticeable signs of pernicious anaemia, it was stated, are a feeling of languor and a yellowish coloring of the skin. These are followed by nausea, vomiting and diarrhoea. In addition there is soreness of the tongue, and numbness or tingling in arms and legs.

The patient may look well-nourished, but the plump appearance is likely to result from a dropical condition. There are no small spots on the skin caused by the absence of blood. Commonly there are loss of weight and slight fever. Pyorrhea is common, with rapid heart action and a

BIG LEAGUE BALL PLAYERS TO EARN LARGE SUMS OF MONEY THIS YEAR

NEW YORK—Bobby Feller, the golden boy of baseball's second gold, an era—even as Babe Ruth was the salaried colossus of the first—leads a total of 26 big league players who will earn from \$20,000 to \$80,000 plus a sum of \$1,000,000.

When brilliant Bobby signed a Cleveland contract which will bring him from \$80,000 to \$100,000 for his work on the hill this year, he became the first player with a chance to better the \$8 grand a year New York Yankees paid the Babe back in '36 and '37.

Although the matter of payment is incidental, it should be pointed out that the home run king got his dough in straight salary while Bob will be paid part of his in bonuses based on his attendance. Apparently \$50,000 of his money will be reported to be in straight salary.

marked lack of acid in the stomach. In about 80 per cent. of advanced cases there is loss of sensation and other disturbances in the limbs, indicating injury to the spinal cord.

The diagnosis of pernicious anaemia depends on the condition of the blood and the character of the stomach secretion. In all cases there is a lowering of the hydrochloric acid to a marked degree. Nervous symptoms are the chief evidence confirming the diagnosis, as do the evidences of change in the spinal cord.

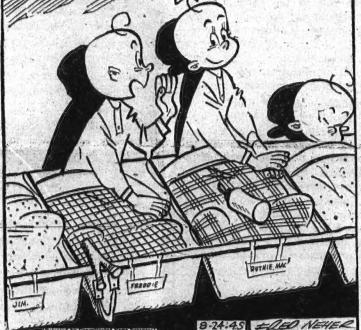

Discovery of the value of liver in blood regeneration has robbed the disease of its terrors. Extracts of liver, given hypodermically, work wonders. Also, sufferers should eat half a pound of pork, beef or calves' liver daily.

SCIENTIFIC WONDER

The Ottawa Citizen says a new fireproof mattress is on the market, especially designed for people who smoke in bed. It is claimed by the maker that the smoker can burn himself to a crisp without the slightest trace of injury to the mattress. One never knows what wonders science will achieve next.

OUR COMPLETE SHORT STORY

MR. PRECISION

By DOUGLAS R. WESTON

ONCE Sam Perwell had loved his wife but now he regarded her with loathing. She had long since lost her natural beauty and especially now her white hair was always untidy and her patrician features had thickened and coarsened. Once she had had a waist; he could almost encircle with one arm; today she tipped the scales at well over two hundred pounds and looked like a sow sacked in the middle.

On the other hand, Sam, although getting toward sixty, looked no more than forty-five and what was more to the point, still felt young. His capacity for enjoying life was still large and if Mathilda couldn't enjoy it with him there were others who could. Particularly Veronica. Unfortunately Mathilda controlled the

purse strings, a fact which Sam now decided to correct.

It was all very simple. The least important was, in fact, the simplicity of it all rather astonished Sam and later, as he sat in his office reviewing the morning's work, he pondered that he hadn't gone about disposing of Mathilda years ago.

As usual he left the apartment at six o'clock, calling goodbye to Mathilda; who still sat at the breakfast table, reading the morning paper. She reminded him, in the hearing of Hilton who lived across the hall, that they were going to bring home a new baby.

The two men chatted inconsequently as they walked down the stairs and up the street. Hilton, who sold insurance, mentioned the epidemic of burglaries in the district of late and suggested that something should be done about it. To this end, Hilton dashed across the street to catch an approaching streetcar and Sam turned east, nodding to Joe How, the laundryman, who was talking to the corner grocer.

At the next corner Sam turned down the street and slipped along the alley to the apartment service entrance and cautiously made his way up the stairs. He let himself softly into the kitchen. Through the doorway he could see Mathilda in the dining room, looking out the window. She never heard her husband sneak up on her nor knew anything more after he struck her with a length of lead pipe. She crumpled to the floor in a sprawling heap with a little surprised "grunt". Sam waited until she was quiet, then snatched her purse and to extract her wallet from her purse.

He had to take a taxi to get to the office for his usual time of eight-thirty, taking the precaution to get out a block or so from the office. Miss Dell, the switchboard operator, was talking to the office manager who looked at his watch as Sam entered.

"I can set my watch by you," grinned the manager. "Precisely eight-thirty." Sam smiled, shaking the name from his hat. His insistence on doing everything precisely on the dot was something of a joke around the office.

"Did you walk over?" asked Milt. Sam nodded. "Every day, rain or shine, winter and summer."

"It might be dangerous in subzero weather," commented Milt. Sam said one became accustomed to such inconveniences but privately he wished Milt had used some other adjective.

In his office he relaxed. The janitor would find Mathilda when he went to the bathroom which he did. In the bathroom which he, Perwell, had expressly called him about the previous night. He would call the police and the police—Sam chuckled. He had no fear of the police. Everything had been planned.

The police came seeking Perwell just as he was preparing to go out for lunch. There were two of them, tall, husky men with pleasant features. One introduced himself as Johnny Beauchamp of the Household and the other was Evan Dhu Carter, whose name was vaguely familiar but whom Sam couldn't place.

"Homicide squad?" echoed Sam. "Yes," Beauchamp nodded, his face grave. "Someone entered your apartment this morning and assaulted your wife."

Sam gripped the desk and swayed hoping the distress on his face was convincing. "How—how is she?" he faltered.

"Dead," said Carter bluntly. It was

the first time ever Sam had been

frightened by the memory of his work

until it gets on his nerves and brings headache, irritability, loss of sleep and indigestion.

A quick way to relieve this condition is to build up nervous energy with Dr. Chase's Nerve Food, the mineral and Vitamin B tonic.

APPETIZING APPLE CAKE

RECIPE

Add 1 envelope Roy. I Fast Rising Dry Yeast and 1 teaspoon sugar to $\frac{1}{2}$ cup lukewarm water, and let stand 10 minutes. Then stir well. Scale off $\frac{1}{2}$ cup flour and add 1/2 cup shortening, $\frac{1}{4}$ cup sugar and $\frac{1}{2}$ teaspoon salt and cool to lukewarm. Add 1 cup sifted flour to make a smooth dough. Let rest in a warm place for 1 hour. Beat well. Add $\frac{1}{2}$ cup sifted flour, or enough to make a soft dough. Knead briefly and place in greased bowl. Cover and set in warm place, free from draft. Let rise until doubled in bulk, about 2 hours. When light and full, turn down and divide into 2 equal portions. Roll dough $\frac{1}{2}$ inch thick; place in 2 well-greased pans ($8 \times 11 \frac{1}{2} \times 2 \frac{1}{2}$). Keep sides of cake buttered, shortening, and sprinkle with granulated sugar. Peel and core 12 apples; cut into eighths; press into dough, sharp edges downward; cover top with $\frac{1}{2}$ cup granulated sugar, sprinkle over cake. Cover and let rise in a warm place, about 1 hour, about $\frac{1}{2}$ hour. Bake in moderate oven at 400° for about 35 minutes.

SAUNDERS WHEAT NEW VARIETY

WINNIPEG.—A new wheat variety known as Saunders, described as highly resistant to stem rust, loose smut and bunt or covered smut, has been recommended for licensing by the joint agricultural committee of the National Research Council.

The committee, in session here, said the variety had been developed by J. G. C. Carl Fraser of Ottawa and was a cross between 'Bell' and '1947', the latter a Brandon, Man., developed strain from the discarded 'Hope and Redward varieties.'

Saunders wheat was said to be the equal of Thatcher in yield and superior to Red Bob, grown in the Peace River, Northern Alberta and the North Saskatchewan fields. It was true to seed or three days earlier in ripening than either of the other two varieties and was also said to be equal to the best wheat in baking qualities.

AULD ACQUAINTANCE NOW FORGOTTEN

A Labrador retriever dog, Glyn, arrived in Toronto, Ont., from Auld, Scotland, to live with his 20-year-old owner, Mr. and Mrs. Eileen Bodrug, and meet the Bodrugs son, Ronald, five months old. Mrs. Bodrug, seen here with Ronald and Glyn, came to Toronto from Scotland with her husband, formerly in the R.C.A.F.

as they were on their way to the apartment in the police car that Sam realized that Evan Dhu Carter was not with them. "He isn't officially connected with us," explained Beauchamp, "although he has worked with us many times. He just happened to be in my office when the call came through."

The police were courteous and efficient. Their efficiency almost pained Sam. Mathilda was lying on the sofa, still comatose, with a pale, blanched face. Other policemen stood watchfully around. Beauchamp wanted to know if anything was missing and Sam looked through her purse and in bureau drawers.

"Her wallet's missing," he reported. "I don't know how much money she had."

They wanted to know what time he had left and he told them, remembering that Hilton across the hall could corroborate his statement. They asked him if he had any ideas and pointed out that he had the distinct record of late had had a number of burglaries; only the preceding week a neighbor who had been walking home late had been pulled into an alley and the rings pulled forcibly from his fingers. Beauchamp nodded and muttered that the force was still understaffed.

After they were through questioning he packed a small bag and went to his brother's to stay for a few days. The police were such simpletons.

Mathilda was buried and the police had apparently dropped the case after a coroner's jury had returned a verdict of death at the hands of a burglar. Sam went to the pawn shop of the furniture, subtlety the apartment and moved into his brother's. Everybody was so sympathetic.

Then, one evening, Beauchamp and Evan Dhu Carter called. Sam was up in surprise as they entered. Beauchamp leaned against the bookcase while Carter slumped into a chair facing Sam. Sam felt uneasy. Beauchamp was regarding him thoughtfully and Carter had the satisfied expression of a cat who has caught a mouse.

"Mr. Perwell," said Beauchamp slowly, "what time did you say your wife left the apartment the day your wife was murdered?"

"Eight o'clock," replied Sam promptly. "I always leave at eight o'clock."

"Yeah," drawled Carter, "and you got to the office at precisely eight-thirty. You're a very precise man, Mr. Perwell."

"My precision is no crime," he snapped. "No," agreed the detective.

"But murder is!"

Perwell gaped. "M-murder!" he stammered.

Carter nodded. "Yeah. I did a little investigating and your office is run by a man Mr. Precision. They say you do everything precisely on the dot. You get in at precisely eight-thirty. At precisely ten you go down stairs for coffee. At precisely twelve-fifteen you go for lunch, returning at exactly one-thirty. You're a very precise man, Mr. Perwell."

"I'm not," said Carter. "I'm a German Crooner. I'm unable to get audience."

BERLIN.—Wilhelm Strienz, German crooner who popularized the Nazi song, "Churchill, You Old Lord of Us All," has nowhere to sing.

Although Allied authorities gave him permission to sing again he finds few sponsors who dare provide him an audience.

But this 38-year-old singer, whose intimate vocal rendering of "Play Little German Soldier" and other German songs caused furor and outrage, continues to scream ecstatically, insists he only sang the Churchill song once.

In 1941 Goebbel classified the Churchill song as "undesirable" because it tends to make the enemy popular with the German people."

The continent of Antarctica has enough ice to cover the entire earth to a depth of 120 feet.

Mucky Sam held out his wrists as Beauchamp produced handcuffs.

"It was too simple," said Carter. "You were so accustomed to traveling precisely the same way every morning that after you'd seen your wife you'd go out the door and come home. You'd go to the front door and walked out the second time."

"And that," said Beauchamp with grim humor, "is precisely where we come in."

During the Azan, Mohammadan call to prayer, passers in the street must stand still, all work must cease and even the sick must sit up in bed.

GARDEN NOTES

* * *

Not Too Formal

An informal layout of flower gardens, lawn and shrubbery about the house almost always gives the best results. Straight rows are officially connected with us," explained Beauchamp, "but there is a matter of professional and large estates. With the average lot in town or country too top and straight lines in each case look dreary and foundation walls and fences. The main idea in gardening is to break them and soften them. To do this, shrubs and trees are planted in clumps around. Beaufort noted that his conditions do not suit certain things that thrive abundantly here. He guards against frost damage by covering the tender plants here. If you are growing vegetables, he advised to stick to those flowers, herbs and vegetables that are easily recommended. Some of the more common plants at the proper time, not too early with tender things that frost or cold weather may check and then they may be harvested when ripe. Old gardeners push growth along quickly with plenty of cultivation, fertilizer, and water when necessary. These are the varieties and types listed in the Canadian seed catalogues. They have all been tested under Canadian conditions and are the only ones recommended by the Canadian authorities.

Grow 'em Fast!

A vegetable taken right out of the ground at the door will be faster than those out of car or storehouse but as any experienced gardener knows, there is a difference between those properly grown and the other kind. The real secret of tender vegetables is quick, unexpected growth.

When you are sowing seeds at the proper time, not too early with tender things that frost or cold weather may check and then they may be harvested when ripe. Old gardeners push growth along quickly with plenty of cultivation, fertilizer, and water when necessary.

"SALADA" TEA

Gave Idea For Telephone Booth

An unidentified Boston lady who complained about the noise of telephone inventor Alexander Graham Bell opened the way to the first telephone booth.

At a luncheon commemorating the 100th anniversary of "Bell's" birth, Gordon B. Moore, president of the Bell Telephone Co., heard it years ago from Bell's assistant, Thomas A. Watson.

"He told me that the landlady of a rooming house where Bell was experimenting threatened to dispossess both of them if they didn't stop that yellin' noise," Watson said.

"So, in hopes of deadening the sound, Watson stripped his room of bedclothes, draperies and rugs and wrapped himself in them.

"And that's how the telephone booth was born."

MILLIONS OF PRINTS

There are more than 400,000 prints in the fingerprint files of the U.S. Bureau of Investigation of the United States. This is said to be the most complete collection in the world.

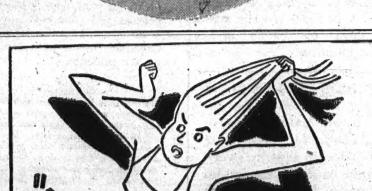

"JUST LOVE" IS RECIPE FOR HAPPY MARRIAGE

Mr. and Mrs. Jonathan Kirkby, celebrating their 62nd wedding anniversary, said "just love" was the recipe for happy marriage. "We were in love when we were married, and we are yet," said Mrs. Kirkby, 83. Mr. Kirkby, 87, added: "The trouble today is that so many young people know each other for about two weeks and then get married."

For constant Smoking Pleasure

Roll your own with "EXPORT" Cigarette Tobacco

If everybody and everything irritate you, something should be done. For instance, coffee in tea or coffee is the cause. Perhaps you should drink Postum instead!

Postum is a grand drink! Not like tea, not like coffee, but so downright delicious you'll love it just for its own sake. And Postum contains no caffeine, nor any other drug to affect heart, nerves or digestion. Made instantly in the cup, it costs less than 1¢ a serving. Try Postum today!

BLAIRMORE NATIVE SON NOW
OWNS, OPERATES AIR SCHOOL

The Lethbridge Herald of March 5
contained the following item:

Born at Blairmore and raised in
the Brooks district, Austin Ingham
today owns five planes and is the
manager of the Yorkton Flying Services.
The Saskatchewan man built his
first glider from plans in a boy magazine
back in 1924.

He learned to fly as a student with
the flying clubs in 1930. Taking his
agricultural degree at the University
of Saskatchewan he continued for
four years with the extension branch
as an instructor in agricultural
engineering.

On April, 1941, he joined the
British Commonwealth Air Training
program as a chief ground instructor
serving at Prince Albert until 1942,
then as staff pilot at Regina and in
1945 as flight commander at Portage la Prairie.
With the close of the war
Mr. Ingham returned to the extension
branch of the university.

He came to Yorkton in May, 1946.
With the assistance of the Yorkton
board of trade aviation committee he
leased the municipal airfield from the
city, and announced he was ready for
business.

Instead of one plane he now owns
three Piper Cubs, a Grumman and a
Super-Cruiser, a large hanger with
workshops, and hires a staff of two
pilots and a dispatcher who is also
assistant manager. Since the first of
the year Yorkton Flying Services has
made over 80 flights of which a third
have been for people needing
medical attention.

atom of goodness in the
Superb Maxwell House
blend.

MISS JESSIE E. HORNE

LAID TO REST

Funeral service was held at Blair-
more United church Saturday after-
noon for the late Miss Jessie E.
Horne, 16, who passed away at her
home here on March 5 following a
lengthy illness. Rev. James McElveen
officiating. Interment was made in
the Union cemetery, with H. Cuthan
in charge of arrangements. Pall-
bearers were: L. Evans, W. Dickson,
S. G. Banman, M. Aschacker, A. Pat-
terson and A. Tilberg.

An old-timer in the Crow's Nest
Pass, the late Miss Horne was born
in Slamanian, Stirlingshire, Scotland,
coming to Canada in 1907 with her
father and brothers, residing in Cole-
man for several years. Since 1917 she
had resided in Blairmore with her
brother. She is survived by two broth-
ers, Robert, of Blairmore and Thomas
of Victoria. She was predeceased by
her sister, Mrs. M. Lloyd, in 1937.

Cliff passes on this gem: A woman
is as old as she looks, but a man isn't
old until he quits looking.

Don Graham
Comments
on
**EVERYBODY'S
BUSINESS**

In Canada, we think rightly
that we have one of the best
democracies, but few of us
ever stop to think how the
vital things of life are pro-
tected and made secure for us.

A thoughtful friend, who
does as much good as anyone
I know, said to me: "Don, do
you realize what it means to
you and to me, and to millions
of other Canadians, that we
can take it for granted that
Life Insurance is safe? There
are 4,000,000 Canadian owners
of Life Insurance and the
number is growing every
day."

The sound reputation of
the Life Insurance companies
in Canada means that you can
pick your plan, your kind of
policies and your company—
no wonder millions of
Canadians invest with
complete confidence.

*Life Insurance is a business built for
everybody, a great enterprise which
protects the future of more than four
million policyholders and their loved
ones. It is a safe, sound, reliable and
easy way to save. Consult
an authorized agent about a plan
best suited to your requirements.*

W.S.

WHO SAYS YOU CAN'T

Can't save? But you did.

*all through the war, with your purchases
of Victory Bonds.*

*So that takes care of any doubts you
may have had about being able to set up
a saving plan, and stick*

*to it. Now the trick is to
find a substitute for that
win-the-war incentive*

*which made you buy more bonds than
you ever thought you could. And it has
to be a reason so compelling that you'll
say "No" without a tremor whenever
you are tempted to spend money you
shouldn't.*

*What more compelling reason could
you ask than you, your family, and all
your secret hopes and plans?*

After all, the most important part of
your earnings is what you save for yourself
and your own purposes. Even though you
never touch your Victory Bonds or other
savings, the mere fact that they are there
makes all the difference. You are less
vulnerable to unforeseen set-backs—better
able to do something about it if oppor-
tunity comes along. You enjoy greater
peace of mind.

These are satisfactions you can't mea-
sure in dollars and cents. But dollars and
cents—deposited regularly in your
Royal Bank Savings Account—can give
them to you.

Next time you're going over your
personal budget, ask
yourself: "Am I get-
ting my share of my
income?"

Quiz...FOR CANADIANS

Every Canadian today is asking himself this question:
"How much more will it cost me to live tomorrow?"

The answer depends on us... Living costs should not increase...

IF—we all keep on resisting the temptation to try to get more than
our fair share of available goods.

IF—we continue to restrict our purchases to what we really need.

IF—we keep on producing as much as we can at as low a price as
we can.

IF—we continue to support to the full our Government's wise
measures of control.

IF—we continue to walk the middle road, the road of moderation in
all things—in our thinking, in our actions and in our pleasures.

IF—as The House of Seagram has always suggested, we continue to
think of tomorrow and practice moderation today!

Practice Moderation Today!

Preventable Illness

IN RECENT YEARS THERE HAS BEEN growing awareness on the part of the public of the importance of health, not only to the individual but to the welfare of the nation as a whole. Efforts have been made by the Dominion and provincial governments through their departments of public health to keep before the people the facts concerning the prevention of disease, nutrition and other matters pertaining to health, while social welfare agencies, insurance companies, the Red Cross Society and other organizations interested in the welfare of the community have also done a great deal towards raising health standards in this country. In spite of the efforts which are made to educate the people along these lines, however, authorities state that there is still much preventable illness which causes inconvenience to the individual and loss to the country through the effect which many interruptions in work have upon the output of our farms and factories.

High Cost To All Citizens

In this connection it is estimated that poor health costs Canadian workers in the neighborhood of \$135,000,000 a year. Loss in production alone is something like \$200,000,000. These are large figures, though to be a serious consideration, the circumstances and the fact that medical authorities are of the opinion that much of the illness which causes this loss is preventable, makes it an even more serious matter. A considerable percentage of the time lost from work because of illness, is due to accidents or to unhealthy working or living conditions. Naturally, the greatest number of accidents are in the larger centres of industry, but there are many too on the farms, when proper precautions are not taken in the handling of machines and other farm equipment.

Safe Working Conditions, and high standards of hygiene and cleanliness both at work and in homes are essential to good health and a minimum of preventable illness. Canada's fortunate in having far-sighted leaders in the field of public health. A great deal has been done in each province by legislation in matters such as safe milk and water supplies, the control of communicable diseases, mental hygiene and numerous other matters. The Western provinces have been particularly alert in this field and have led other parts of Canada in many things including the treatment of tuberculosis and cancer. There is much knowledge, and there are many services at the disposal of the public and it is the duty of every citizen to avail himself of these services and to co-operate in every way in reducing the great national waste which is caused by preventable illness in Canada each year.

Robbed of Sleep by Rheumatic Pain

But No Pain Now—After a Few Weeks of Kruschen

A woman's gratitude at being rid of "rheumatic pains" caused her to write this letter:

"Used to have such dreadful pains in my knees, ankles and shoulders, to say nothing of my back, which used to feel as if it would break. I had no ease, especially at night . . . but since taking Kruschen Salts for a few weeks only, I feel a different woman, thank goodness! I can sleep now, I feel much brighter and better in every way, and shall continue with Kruschen Salts." — (Mrs.) M.H.

Most rheumatic pain and swelling is caused by too much uric acid in the body. These painful deposits settle in the muscles, joints and nerves, irritate the nerves, and inflame the tissues. Kruschen Salts acts on these pain-making deposits by dissolving them and carrying them away to pass them out of your body. This relieves the pain and if you are wise, you will take Kruschen Salts every day. Kruschen Salts is a help against further attacks. Try Kruschen for the relief of rheumatic pains and lamboago. 25¢ and 50¢ boxes of Kruschen dry salts.

INTERESTING FIND

A burial ground of the late bronze age—nearly 3,000 years ago—has been unearthed during excavation work on a housing scheme at the Midlothian settlement of Pinkinham, Scotland. In two cairns were found two urns containing cremated bones.

PREDICTS CANADA TO BE EMPIRE HUB

LONDON.—Fifty years hence Canada will be the strategic centre of the British Empire, C. R. Fair, formerly professor of the economics department at the University of Toronto, wrote in a letter from Cambridge, England, printed as a Sunday Times editorial.

Canada, he said, by reasons of her immense resources of minerals and the power and quality of her people "will, with a much smaller population than the United States, nevertheless outstrip the United States in internal wealth and striking power."

Fay continued:

"It follows that Canada cannot allow herself to be attacked militarily or diplomatically to England. England, therefore, must gradually work to the position in which she is attached to Canada."

"Canada will not welcome the implications of this. She herself would like to continue as a middle power, intermediate and mediative, but ultimately her policy must conform to the realities of power, and she will welcome the accommodation may be."

Fay also referred to the "disastrous

policy of placating Russia and the United States by surrendering the balance of our overseas Empire."

FUNNY And OTHERWISE

"What made you decide to put off your wedding by two days?"

"Well, you see, I reckoned it out that my silver wedding would come on a Saturday, and I always play golf on Saturday."

The landlady showed her new lodgers into their room, and hovered about anxiously while they looked around.

"I don't want to be a good fool," she exclaimed. "So if there's anything you want that I haven't got, do let me know, and I'll show you how to do without it!"

The afternoon speaker had talked for fifteen minutes.

"After partaking of such a meal," he continued, "I feel if I had eaten any more I would be unable to talk."

From the far end of the table came an order to a waiter: "Give him a sandwich."

"That pretty girl seems to be having a good time!"

"I'm, yes—her fiance, a young medical officer in India, is coming home to marry her next month."

"Well, she certainly seems to have solved the problem of what to do till the doctor comes."

Minister: "I made seven hearts today."

Parishioner: "How was that?"

Minister: "Married three couples."

Parishioner: "That only makes six hearts."

Minister: "Well, you don't think I did it for nothing?"

Employer (interviewing applicant for job): "Knowing anything about electricity?"

"Yes." "What's an armature?"

"A chap who boxes for nothing."

"I can't understand why I didn't get that job," said Betty.

"Well, what did the manager ask you?" inquired her friend.

"He asked if my punctuation was good."

"And what did you say?"

"I said I'd never been late for work in my life."

Major: "Your son should be written in such a manner that even the most ignorant can understand them."

Corporal: "And what is it, sir, that you don't understand?"

Custodian: "But if you are selling these watches below cost, where does your profit come in?"

Dealer: "We make our profit repaying them."

Little Winnie (seeing the vicar approaching, and remembering the text he had given her at Sunday school): "Oh, Mummy . . . Here's the gentleman who gave me that advertisement about Heaven."

"Happiness," said the philosopher, "is the pursuit of something, not the catching of it."

Citizen then asked: "Have you ever chased the last bus on a rainy night?"

NOT GOING ANYWHERE

CARIBOU.—A bomb was exploded from the Blyerville Free Methodist Church, trying to convert Harry F. Hall, a prisoner in the county jail, discovered that Hall was digging his way out. Sheriff Wilmer O. Oliver wasn't too worried. Hall was tunneling through a wall which led to a corridor—still inside the jail.

The bombard, a type of canon introduced before the 13th century, could throw stone balls from 250 to 500 pounds in weight.

Master Chessboard

Pondering a move, Frank Lillie, 12, is seen at a meeting of the newly formed Junior Chess League of Toronto, Ont. Membership has reached 500 and is growing.

One of the keen players of the youthful chess group is June Applequist, 14, seen here. I. A. Horowitz, outstanding U.S. chess player, played 40 simultaneous games with the youngsters.

Chess tournaments in which 20 Toronto schools are represented are now in progress. Joanne Higgins, 13, is another of the young students of the pastime learning the complicated plays.

GEMS OF THOUGHT

CHOOSING

The strongest principle of growth lies in human choice—George Eliot.

The measure of choosing well is, whether a man likes and finds good in what he has chosen—Lamb.

Choose always the way that seems the best, however rough it may be; custom will soon render it easy and agreeable—Pythagoras.

The objects we choose and the spirit we manifest reveal our standpoint, and show what we are winning—Mary Baker Eddy.

Men must be decided on what they will not do, and then they are able to act with vigor in what they ought to do—Mencius.

A determinate purpose in life and a steady adhesion to it through all disadvantages, are indispensable conditions of success—W. M. Punshon.

BY ANNE ADAMS

FRENCH PLANE HAS HARROWING 400-MILE FLIGHT OVER ATLANTIC

IMPORTANT CARGO JETTISONED

PARIS.—Eleven passengers and six crew members of a French plane landed safe in Casablanca recently after a harrowing 400-mile flight over the Atlantic Ocean in a crippled airliner.

The trouble developed after the four-engine Douglas jet left the Azores on the last leg of its New York-Paris flight. The plane crashed, one right motor.

Trouble later developed in the second right engine and the plane began to drop altitude. The crew jettisoned 40,000 copies of recently-signed satellite peace treaties planned in the United States, was jettisoned.

The plane began to rise again, and ventured away from the vicinity of two freighters which volunteered to stand by in case the craft went down in the Atlantic. When the plane ar-

rived over the Casablanca airport, the plane was "normal" and none aboard suffered any physical harm. Passengers were to be transferred to another plane for the flight to Paris.

The crew of the stricken plane declared that one of the right motors caught fire and burned out completely. It took the other right motor then began to fail. Lisbon said the second motor stopped.

In Paris, however, a representative of Lockheed Aircraft, builders of the Constellation, said three motors were working when the plane landed in Casablanca, and that none was burned out.

BRIEF IN HUN ARMY SPIED OUT GERMAN SECRETS

ROURKE END, Bucks.—Lt.-Col. Alexander Patterson Scotland might have served as the original for a Baroness Orczy type thriller.

The 80-year-old British Intelligence officer served in the German Army during World War I and at one time knew almost the entire disposition of the Nazi armed forces.

Scotland's colorful story came to light in Venice when he testified at the war crimes trial of Field Marshal Albert Kesselring, former German commander in Italy.

But some linking of his story came from his grey-haired, blue-eyed wife who told what she knew at her small cottage here.

Mrs. Scotland said that people at Barrie, Ontario, suspected her husband's double life. They knew there was something "fishy" about the way he was called for and returned home in a military car and the way he disappeared without notice for months at a time. But that was all.

His wife, who saw almost nothing of her husband for four years, said she knew he often left the country, but was surprised when she learned he had become attached to the German Army.

"He knew Germany very well and went there a lot before the war," she said.

"I don't know, of course, how he worked there or what his methods were."

According to Josephus, Jerusalem once had a population of more than 1,000,000.

New Weather Stations To Be Established In Arctic Circle

OTTAWA—Canada will establish nine new weather stations in the Arctic Circle to improve her domestic and international weather forecasting services, Reconstruction Minister Howe announced in the commons.

The stations will be established within the next three years and will be operated for at least five years to enable a complete study of their value in forecasting weather.

While Canada will be responsible for establishing the stations and supplying the officers in charge, the United States, because of her direct interest in the results, had agreed to supply technical officers and assist in the establishment and operation of the weather outposts.

Mr. Howe said that the Russians acted similarly to Canada in Arctic sources of weather, maintained a large number of weather stations "on the other side of the North Pole." Canada already exchanged a large amount of weather information with Russia and the Canadian stations would benefit the interchange.

Most northern station in the new chain will be located in the vicinity of Eureka Sound, on the northwestern side of Ellesmere Island, some 600 miles from the North Pole. The main station will be at St. Peter Harbor on Melville Island, at approximately 75 degrees north latitude, 110° west longitude. Location of other stations was "a matter for further study."

It is anticipated that the establishment of Arctic weather stations will provide valuable statistics which are of inestimable value to our national economy, and particularly to enterprises in many fields," Mr. Howe said.

"From an economic point of view, long-range weather forecasting would save millions of dollars in terms of monetary costs—in establishing, and maintaining these stations. Their establishment would also determine the feasibility of air routes across the polar regions."

Repair Costs Of Veteran Houses Paid By Ottawa

OTTAWA—Veterans Minister MacKenzie, answering opposition charges of faulty construction in veteran houses, said in the commons that the government will pay for "a 100 per cent repair job" on 2,600 housing units built on small holdings under provisions of the Veterans' Land Act.

Mr. MacKenzie, saying that the repair work would cost between \$500,000 and \$1,000,000, stated that many of the defects were due to "faulty workmanship" and the use of "faulty materials". All the conditions were "remediable and, with few exceptions, at a very small cost." It was hoped the work would be completed within a year.

Speaking during continued throne speech debate, Mr. MacKenzie rejected a Progressive Conservative party suggestion that a royal commission be established to investigate the building of houses for veterans.

The only feature of which a royal commission could deal, in my judgment, would be the question of a cut in capital cost," said Mr. MacKenzie. "If we were to ask a royal commission to examine the physical condition of these houses it would simply be delaying their completion and delaying the furnishing of the amenities to which these settlers are entitled."

Besides the minister, speakers in the debate included Hazen Argue (C. P. C.) and Mountjoy (P. C.).

Air Argue sought to discuss the application now before the board of transport commissions for a 30 per cent. increase in railway freight rates but Deputy Speaker Ross Macdonald ruled that the matter was "out of order."

In reply to opposition requests as to why the contractors should not be asked to pay the cost of repairs, Mr. MacKenzie said that the question was a legal one and still was being considered. It was definite that the cost would not fall back on the veterans.

The minister said he was dealing only with 2,600 houses on small holdings.

The veterans department now has in the field a committee that was investigating sample houses in small holdings' projects. This committee was recommending the repairs which should be made.

The houses had been built at a time when there was an "absolute horrid shortage" and at a time of great difficulty 2,600 houses had been provided on small holdings. The contracting firms used bad been of the highest reputation and were all financially sound.

VON PAPEN SENTENCED — One-time ace diplomat of Germany, Franz von Papen, seen here under U.S. guard, has been sentenced to eight years in a labor camp and barred from public office for life by a German denazification court. Four months ago the 68-year-old Nazi was acquitted of major war criminal charges by the Nuremberg international tribunal.

INTERESTING DISCOVERY
CANTERBURY, England. Remains of a Roman house, believed to belong to the mildest part of the continent, have been discovered beneath the coachyard of the blitzed Rose hotel.

World cotton production for 1945-46 is estimated at 21,650,000 bales.

PROPOSE POSTAGE INCREASE
WASHINGTON.—The United States post office department proposed to double the rate on post office cards and generally increase rates on all mail except first class letters.

Approximately 1,500,000 Indians still reside in Brazil.

ATOMIC WAR COULD DESTROY WORLD'S FOOD

TOKYO.—An atomic war could result in the destruction of the world's food supply, an agricultural expert at the U. S. MacArthur's headquarters warned.

A foodless world could result from plant sterility caused by the effects of atomic bomb explosions, W. M. Myers declared.

It was reported recently that abnormal life had been discovered in plant life in the atomic explosion areas of Japan.

"Future generations of plants as well as current plants can suffer from atomic war," he said.

Myers, from State College in Pennsylvania, is a research specialist of the agriculture division of Army headquarters natural resources section.

If a gigantic world-scale atomic war came along, there is danger that plants would come down from radioactive dust particles that would be thrown into the air," he said.

"Not only would existing crops be wiped out if radioactivity of the particles was sufficiently intense, but surviving crops would be affected."

Help! Help!

VANCOUVER.—More than one city resident objects to visits from mothers-in-law!

One Vancouver man who placed an advertisement in a local paper which said:

"Help! Help! Mother-in-law arriving. Unless I find her a place to live she will move in with us. Anything will do—an apartment or house, large or small, furnished or unfurnished. It's a doghouse for her to live in."

Sympathetic readers flooded him with offers to take the burden off his hands.

A mother-in-law who saw the advertisement said she wanted to "put ad should be banned from the newspapers. It's the most dastardly thing I ever heard of."

A half-million species of insects have been catalogued by mankind.

OFF ON EUROPEAN TOUR

Harold Stassen, former governor of Minnesota, and a presidential prospect, waves from the steps of a Clipper at a New York airfield. Stassen plans to visit countries including Russia to observe economic conditions, meet leaders of those nations and to add to his background of foreign affairs. Stassen emphasized that he will travel as a private citizen and a leader of the Republican party. During his visit to Russia, Stassen said he hopes to obtain an interview with Generalissimo Stalin.

CANNOT USE SLIT TRENCH IN ARCTIC

CHURCHILL, Man.—With the possible exception of the slit trench, most of Canada's weapons of the Second Great War appear to have made efficient debuts under the impetus of post-war conditions.

Although officers of the joint services winter experimental base say it is too early to report fully, their statements seem to indicate that such arms as the 25-pounder field gun wireless set, the Bren-gren and rifle-grenade sets of northern operations and some minor technical alterations in some cases. None of them has fallen down completely in trials conducted by soldiers.

Certainly as far as the frozen tunnelling concerned, the slit trench, a common weapon in the First World War, appears to be out. In the case of many a Canadian soldier, its feeble effect of length and width would probably cost a lot of money up here.

American engineers have been using the shaped charge, which helped much in the development of modern defences, as well as other wartime explosives in efforts to blow holes in thin soil. Their experience is that they can do it if they want to, though it is slow.

At a rough guess, it would probably cost at least \$50 to blast out a slit trench comparable to the size of those which Canadians showed in the soil of Europe.

BUTTER SITUATION SAID IMPROVED

OTTAWA.—The butter situation is about twice as good as it was a year ago, the board of arbitration said.

The short-shred stocks of creamery butter held in nine principal cities March 1 amounted to 11,255,050 pounds; compared with 5,569,156 a year ago. On Feb. 1 stocks were 17,444,172 pounds.

On Feb. 1 stocks March 1 were 12,907,308 pounds, compared with 14,820,432 Feb. 1 and 14,235,418 March 1, 1946.

Funds Provided To Facilitate Housing Needs

OTTAWA.—Funds to facilitate housing—both emergency and normal—are provided in the estimates tabled in the commons.

The new federal expedient of moving houses from one locality to another to meet emergency conditions is forecast in the estimates for the reconstruction department, and an estimate of \$700,000 for the purpose is provided.

No explanation of how the plan would work is given in the list of proposed disbursements. It was recalled, however, that some municipalities have been considering the scheme on a small scale over the last couple of years. As the municipalities employed it, surplus housing in one area was purchased, knocked down, transported to another place and then set up again.

Stassen, who had planned to go with the proposal was not indicated. The estimates indicated only costs of transportation involved.

Another spur to housing of the more varied type appeared in the estimates in the \$1,000 item to provide incentive bonuses to encourage construction of strategic building materials. It was the first time the size of the sum available for this purpose had been made known. However, Reconstruction Minister Howe recently said in the commons this type of bonus would be paid only as a last resort. So far, only one payment has been made.

Indication that the operations of Wartime Housing, Ltd., will be continued after the war ended, was thought somewhat reduced. No bonus was given in the estimates. The wartime housing estimate for the coming fiscal year is \$27,500,000, compared with \$42,000,000 for the current year.

Plans for reeducation is the home conversion plan, for which the present year's \$500,000 estimate has been sliced in half.

Large Sums To Be Spent On West Projects

Farm Rehabilitation

OTTAWA.—An increase of \$1,125,000 for special work such as prairie farm rehabilitation and irrigation and assistance to certain basic industries was the major jump in 1947-48 estimates to the Dominion department of agriculture tabled in the commons.

The department's estimates for 1947-48 totalled \$23,202,947, an increase of \$2,349,135 over the \$20,853,811 voted for the 1946-47 fiscal year. The largest increase, \$224,135—was spread through the various services of the department including a jump of \$559,995 in the production service.

In addition \$30,147,820 was provided for the prairie service and the heading of demobilization and reconversion. It had to do with continuance of certain special boards and completion of the wartime functions of others, such as the agricultural supplies board.

The seed service category \$1,500,000 was provided for the St. Mary's river dam project in southern Alberta which will provide irrigation for thousands of acres of land. The project now is underway.

The service was headed by \$3,000,000 prairie grain storage rehabilitation act work and for water storage in the prairie provinces.

Expansion of the agriculture department's science service and its experimental farms was reflected in increased grants in both categories. A total of \$3,479,630 was provided for science, up \$240,069 from last year and \$4,100,246 for experimental farms, a boost of \$297,648.

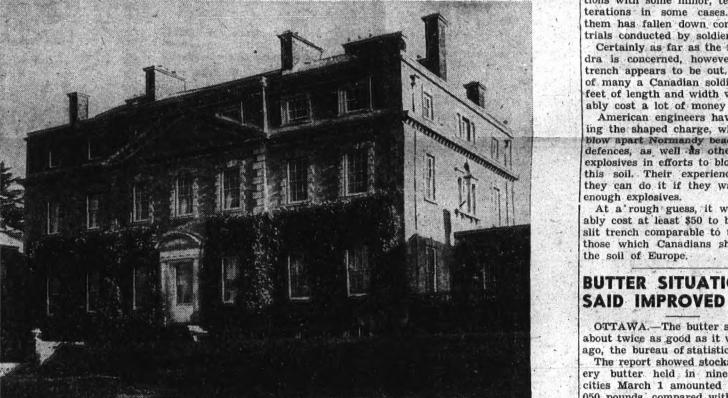

The production services, taking in such activities as animal health, control of contagious diseases, grants to fairs and aid to plant productions, including a \$31,000 grant to the Canadian seed growers' association, got \$4,792,759, an increase of \$4,200,000 in the present fiscal year.

The department's marketing service was granted \$3,307,423 compared with \$3,257,861 last year, including an item of \$777,599 for subsidies for cold storage warehouses. The marketing service got \$3,267,861 last year.

ENDED IN FAILURE

BUENOS AIRES.—Negotiations for an Argentine-Russian commercial treaty, deadlocked for the last six months, ended in "outright failure," well-known diplomatic circles said.

Argentina is the second largest South American country in both area and population. 2715

TRAFAKLAR HOUSE MAY BECOME NATIONAL MEMORIAL — Abolition of the \$20,000 annual subsidy of Lord Horatio Nelson by Britain likely will result in the sale of historic Trafalgar House (above) in Wiltshire, and it may become a national memorial. The 100-room mansion was purchased with \$400,000, a state gift, in 1805. Telescope which Lord Nelson clapped to his blind eye at the battle of Trafalgar, treasured with one of the admiral's uniforms, may be presented to the nation when the annuity ceases.

In North Britain Winter, In South Spring

A new blizzard in north of England coal-producing areas again tied up collieries and transportation as London basked in sunshine. Fuel crisis remains acute but factories in the Midlands are reopening. New staggered hours for workers in attempt to conserve fuel means 7,000,000 go on night shifts. Here coke ration is given queue in Surrey.

**Little crippled children
will romp and play again**

because of your Red Cross help

WITHOUT the help of the Red Cross, many little children, whose parents cannot afford medical and surgical treatment, would have to go through life with crippled arms, feet, or other deformities. With the help of the Red Cross, scores of little ones will romp and play again and grow up as healthy, normal men and women.

Mrs. J. R. Smith, Sec. Phone 152 Mrs. J. B. Harrer, Vice-Pres. Ph. 277

CANADIAN RED CROSS
The work of mercy never ends—Give

In some localities the Red Cross maintains its own hospitals for crippled children. In other localities it supports the splendid work being done by modern children's hospitals. This work must be continued, and expanded. It is directed by the Junior Red Cross. Will you help restore these little crippled ones to normal health and strength?

Local and General Items

Young lady, (leaping into taxi): "To maternity ward — but take your time, I only work there."

A concert is to be held in the Frank hall on Sunday night, under auspices of IMBF Hungarian branch of Hillcrest.

Fred Perry called on The Graphic this week, returning to Fernie from a visit in Calgary with his son, RCMP Const. Gordon Perry, and Mrs. Perry.

The hall committee is sponsoring a St. Patrick's dance in the Lundbreck hall on the 17th, with an old-time orchestra supplying music.

Ye editor and Dick Vernon enjoyed an off-duty-visit from RCMP Const. Gordon Perry, an ex-Fernie boy, while in town Wednesday in connection with court cases.

FORMER BLAIRMORE BOY MARRIES AT EDMONTON

The marriage took place quietly February 22 in Edmonton at Norwood United church of Blanche Lilian, daughter of Mrs. M. A. Gray and the late Mr. Gray of Leddington, Middlesex, England, to Mr. Bertram McClure Huffman, Rev. W. T. Young officiated.

The bridegroom is a son of Capt. M. B. Huffman, who is overseas, and Mrs. M. B. Huffman of Calgary. Miss Margaret Morgan and Mr. Richie Mathews both of Edmonton, were attendants.

Mr. and Mrs. Huffman are residing in Edmonton where the former is attending the University of Alberta. He served overseas for more than five years with the 8th Field Regiment.

The Huffman family resided in Blairstown from 1919 to 1925 when Mr. Huffman was the lino operator for The Enterprise.

Mrs. Tom Hadwell is spending a few days in Calgary visiting her son, Mostyn.

Mr. and Mrs. J. McAndrew, of Calgary, were Blairstown visitors for a few days, returning to Calgary on Wednesday.

The sermon topic at Central United church on Sunday evening will be "Fruitful lives." You are cordially invited to be present.

The final game of the CNP curling bonspiel was played here last Sunday when Vansacker, of Fernie, won over the Excel rink from Coleman 14-6 to decide the Grand Aggregate.

The nudists were planning a costume party and the ladies were worrying over what to wear. "Well," said one, "With my varicose veins, I think I'll go as a road map."

Funeral services were held in Calgary on March 22, for Mrs. Sarah McLean, a native of Ayrshire, Scotland. She came to Frank 40 years ago and was looked upon as a real old timer.

Mrs. Fred Padgett, of Bellevue, was elected president of the Rebekah Assembly of Alberta during the opening day of the annual session held in the IOOF temple at Calgary on Tuesday of this week.

Among the Blairstown guests at the Walker-Hill wedding which took place in Calgary recently were Mrs. D. Walker and Miss Kathleen Walker mother and sister of the groom, also Mr. and Mrs. Arthur Williams.

We wish to acknowledge receipt of a card from W. A. Vaughn, who has now taken up residence in Vancouver. We are not sure whether he had to bypass Blairstown or went "over" on his way from Wolfville, N.S., to the coast city.

Usually husbands follow wives. In the highly diverted farce, "The Gang's All Here," the wives follow their husbands, unknown to the latter. The same surprise that is in store for the convention attending husbands and flames is in store for the audience who witness the modern screamingly funny play at the Columbus hall, March 17 and 18 at Blairstown.

DESIRE to SERVE PLUS ABILITY

LOOK...**"Cash in"****Your Empty Beer Bottles**

The shortage of bottles is acute. In order to maintain the current supply, Brewers of Alberta request your co-operation in returning empties. Don't keep empty bottles around the house. Apart from taking storage space, they represent cash to you. If you live in points where Branches are located (see below) phone for a pick-up, or deliver them yourself. If you live in points where such Branches are not located, ship your empties to the nearest point, "freight collect". Payment will be forwarded to you, promptly. Get out your empties and turn them into Cash!
